# Organizational Ingredients for TAM

What concrete practices of your agency would you like to share with the participants?

- Collaborative Planning
  - TAMP, MnSHIP, STIP, etc.
- Performance based planning methodology established
- Asset Management Steering Committee
  - Joins Planning, Operations, and Engineering Divisions
  - Unified voice for Asset Management decisions
  - Process and Priorities related, not Asset specific advocates
- Asset Management Project office
  - Takes ownership, coordinates across functions
  - Planning, stewardship of AgileAssets, other technologies
  - Analytical services
- Collaborative work between business and IT
  - TAMS RFP, Selection, Implementation teams
  - “Tool” development – “Agile” process

# Organizational Ingredients for TAM

What is your opinion on what ingredients are the most important?

- Executive Leadership Support
