

# Example Reporting Template

## EXAMPLE Bridge Condition Template

*Note that AASHTO recommended measures are assumed for the purposes of this exercise.*

NHS bridge deck area on structurally deficient (SD) bridges as a percentage of total NHS bridge deck area.

NHS Deck area	
Baseline Value (%SD)	
As-of Date	
Performance Result (%SD)	
Date Reported	
<i>(rural/urban)</i>	
National Minimum (%SD)	10% SD
Performance Target (% SD)	
<i>(rural/urban)</i>	
AM Plan actions to achieve target	

The percentage of NHS bridges in good, fair, and poor condition, weighted by deck area.

**NHS Deck area**

---

Baseline Value (%g/f/p)

---

As-of Date

---

Performance Result (%g/f/p)

---

Date Reported

---

*(rural/urban)*

---

Performance Target (%g/p)

---

*(rural/urban)*

---

AM Plan actions to achieve target

---

**Notes:**

- States establish performance targets; may vary by urbanized vs. rural area
- States must submit biennial reports on progress in target achievement (no funding-related penalty for failure to meet state-established target)
- Asset Management Plan must include actions to achieve targets if substantial progress not made after 2 consecutive reports
- Federal share can be reduced to 65% if Secretary determines that a State’s Asset Management Plan is not consistent with MAP-21 requirements
- States must meet national NHS bridge minimum condition levels established in MAP-21 – failure to meet triggers restrictions on use of NHPP funds
