

Example Reporting Template

EXAMPLE Pavement Condition Template

Note that AASHTO recommended measures are assumed for the purposes of this exercise.

Pavement in Good, Fair and Poor Condition based on the International Roughness Index (IRI)
 See Background Resources document for discussion of a Pavement Structural Health Index.

	Interstate	Non-Interstate NHS
Baseline Value (%g/f/p)		
As-of Date		
Performance Result (%g/f/p)		
Date Reported		
(rural/urban)		
National Minimum (%p)	20% Poor	
Performance Target (%g/f/p)		
(rural/urban)		
AM Plan actions to achieve target		

Notes:

- States must meet national Interstate pavement minimum condition levels
- Failure to meet minimum condition levels triggers restrictions on use of NHPP funds
- State-established targets may vary by urbanized vs. rural area
- States face no funding-related penalty for failure to meet state-established target
- States must submit biennial reports on progress in target achievement
- Asset Management Plan must include actions to achieve targets – if substantial progress not made after two consecutive reports
